TVSnext AI Digital Platforms

AI Accelerator

Scale your AI from pilot to production

Define your strategy, innovate your business processes and elevate products, platforms and services across your enterprise

Inspire

We will help you define an adoption strategy and gain a clear understanding of near-term AI use cases. Analyze the risks and limitations of your specific industry and business function to craft the ideal strategy suited for your needs.

Activities

- Kickstart AI Workshop
- Assess AI Readiness
- Define AI Strategy

Target Outcome and Value

Business usecase definition
- AI Readiness Assessment
- AI Strategy definition

Timeline: 1 Week (Jumpstart Workshop) | 5 Weeks (Readiness and Strategy)

Discover

Raise awareness on the potential of AI throughout your organization, and ideate possible futures based on your needs and current technology landscape. Discover and select appropriate use cases with clearly defined business value and build a set of working prototypes that incorporate and prioritize your technology vision.

Activities

- Facilitate AI Hackathon
- Co-ideate and learn alongside AI experts

Target Outcome and Value

Business usecase and solution definition
- Working prototype for every use case

Timeline: 6 Weeks

Elevate and Action

Establish a joint AI Garage to iteratively build and deploy the prioritized use cases. Start with an initial use case and then scale further through proper underlying foundations in data and MLOps.

Activities

Implement productionable MVP for one selected use case
- Enable scale by bridging technology gaps (Modern Data Platform, MLOps)

Target Outcome and Value

- Deployed use case in production and realized benefits
- Ready for scaling next set of use cases

Timeline: 12 weeks (MVP)

A 6-week consulting workshop to conduct a holistic AI maturity assessment, identify gaps and build a roadmap with prioritized recommendations for your AI journey
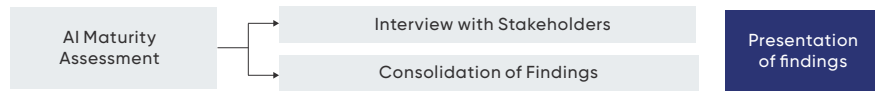

Map the Vision (1 week)

In this phase, we will work with your teams to understand your organization's aspirations and identify how AI can accelerate your goals.

| Mobilize Stakeholders | → | Strategy & Vision Review |
| | | Envision Target State |

Kick-Off Workshop

Assess & Evaluate (2 weeks)

In this phase, we will assess your organization's AI maturity through surveys and interviews. Based on these findings, we will identify the AI use cases and present them to your stakeholders. Findings will be consolidated, benchmarked and discussed with stakeholders.
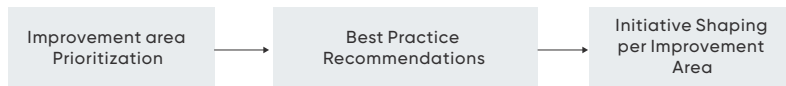

| AI Maturity Assessment | → | Interview with Stakeholders |
| | | Consolidation of Findings |

Presentation of findings

Key Result: AI use case identification & AI maturity assessment report

Enable (2 weeks)

In this phase, we will identify 3 priority improvement areas work together with your team to shape an initiative for maturity growth.

| Improvement area Prioritization | → | Best Practice Recommendations | → | Initiative Shaping per Improvement Area |

Key Result: Technology blockers & key success factors identification; Customized best practice recommendations

Plan (1 week)

In this phase, we will aggregate the identified improvement initiatives on a joint roadmap along with the owners, key milestones and immediate next steps.

| Roadmap Execution Planning | → | Final Presentation, Playback & Retrospective |

Key Result: Scaled AI Initiative; Descriptions & Roadmap
